

## **PACKAGING SOLUTIONS**

FOR FOOD-INDUSTRY, CATERING AND TAKE-AWAY

## The modern packaging

*for your fresh food ideas*

The customer is looking nowadays for a balanced diet, variety and choices. It's becoming more and more uncommon to cook on a regular base because of busy lifestyles like increasing mobility, short breaks and long working hours. Nevertheless, the demand for quality, freshness and taste is rising. Therefore, ready-meals and food-on-the-move are in vogue.

The choice of the food packaging solution is very important today which meet all of the food service needs.

Smart packaging has to fulfill more and more requirements such as shelf life, hygiene, transport, attractive presentation, advertisement, sustainability, taste and easy handling.

## The ALX System

*more success for food-to-go*

ALX<sup>®</sup> offers a modern packaging concept by perfectly composed functionalities and has more than 30 years of knowledge and experience in the food-service business. Several thousand customers are using our sealing system successfully for years.

Our concept is a superb combination of interchangeable containers, films and tray sealers. At ALX<sup>®</sup> you will find a wide range of attractive menu and deli trays for food-to-go.

Our product line is permanently updated and meets all current EU requirements.

The ALX<sup>®</sup> system is designed for food-to-go, which can be hot, cold, chilled and frozen. It is perfect for following take-out sales: take-away, casual dining, meals-on-wheels, street food and cook & chill. It can be used for test markets and laboratory applications as well.

## ALX tray sealers

*the perfect take-away system*

The wide range of ALX<sup>®</sup> tray sealers offers the perfect model for every application: the Classic, Compact and Comfort line. Our versions with the integration of two or three film rolls are unique and multi-functional. It is a safe investment for many years and increases sales.

The patented machines are easy to use – also economic for small-volume. They work well to seal both cold and hot food.

ALX<sup>®</sup> tray sealers stand for quality, minimal maintenance, reliability as well as state-of-the-art technologies, are safety-tested and made in Germany.

## The EPS sealable trays

*outside cold - inside hot & tasty*

The vast range of EPS sealable trays are ideal for hot menus, soups or snacks by providing excellent isothermal properties. The content is kept hot up to 30 minutes.

The ALX<sup>®</sup> trays are sealed leak-out proved with aluminium foil, so the individual taste of the products stays in each compartment. You can choose from our comprehensive collection of EPS trays for any use.

It's perfect for your street sale and delivery service, inside lamination for extra strength, ultimate heat insulating properties (expanded polystyrene), comfortable grip, quick and easy to open (peel-effect), all for an economical price.

## The CPET trays for the oven

*outside aroma-tight sealing - inside fresh & tasty*

Fresh and chilled menus and convenience products, which can be heated up quickly and easily in the microwave and the conventional oven, meet the current trends.

Because of their temperature resistance (-40°C - 220°C) the CPET trays are a high quality and versatile answer to many individual catering applications. The inside surface has a shiny and attractive appearance. ALX<sup>®</sup> trays can be securely sealed with polyester film which optional anti-fog treatment prevents getting steamed up.

You can pack your premium food for different uses and possibilities into the CPET trays like frozen menu components, delicious ready-meals, delicate pastries and snacks. Trays and film are dual-ovenable. Great variety of single and multi-compartment trays available.

## The PP trays for the microwave

*outside aroma-tight sealing - inside fresh & tasty*

The wide ALX<sup>®</sup> PP range is fully microwaveable and an all-rounder for snacks, stylish ready meals or even trendy chilled food. The trays are sealed fast and simple in the tray sealer with a transparent lidding film. Packed leak-resistant in our PP trays all kind of high-quality food is safe during transport and great for heating or reheating in the microwave.

They can be excellent displayed if desired and keep the food fresh and tasty. It lifts your take-out sales to new heights.

Available in both black and white these trays can be used to compliment any food product. Great variety of single- and multi-compartment trays available. Brand new in practical gastronorm sizes with varying depths.

## APET trays for delicatessen

*keep it fresh and tasty*

ALX<sup>®</sup> provides a crystal-clear APET packaging solution for your cold delicacies. The APET range promotes the quality, the freshness and the premium look of the content.

The attractive trays are closed quickly and easily by the ALX<sup>®</sup> tray sealers with a high transparent lidding film. The sealing is absolutely leak-proof, so the aroma and the flavour are preserved for longer. The food products stay fog-free and are securely protected during transport. In addition to the crystal clear version, the trays are also available in high gloss black looking great on the shelf.

The ALX<sup>®</sup> APET trays are designed for take-away of fresh salads, tasty delicacies, delicious desserts and dairy products. They are temperature-resistant up to 60°C and will not crack or break.

## The eco-friendly PLA packaging

*made of renewable resources and 100% biodegradable*

The customer's environmental awareness has been increasing for years. ALX<sup>®</sup> has created a convincing and natural solution for your cold organic and vegetarian food products. It has been developed to meet the needs of caterers who want to demonstrate their environmental commitment. The PLA trays have comparable properties as conventional oil-based packaging with the benefit of a green and sustainable image.

The eco-friendly PLA packaging is also sealed quickly and easily with a transparent PLA lidding film. It helps to maximize the quality, freshness and visual appeal of the food products..

The PLA trays are ideal for cold and fresh meals such as salads, fruits, delicatessen and desserts (up to 40°C). They are produced of renewable resources (100%), completely bio-degradable (in a composting plant) and reduce the environmental impact.

## The PP deli and sandwich trays

*for your fresh and light trends - grab & go*

Finger food, sandwiches, fresh-cut fruits and vegetables are convenient, healthy and tasty. The freshly prepared and packed snacks are ideally suited for ready-to-eat or take-away. Delis, mixed fruits and sandwiches are a longtime bestseller in the UK and in the US. Now, you can find it also in many countries across Europe at filling stations, convenience stores and supermarkets.

Attractive food deserves equally fine packaging. The sealed ALX<sup>®</sup> trays are an eye-catcher in your fridge cabinet by keeping the content fresh and tasty. They help to increase your take-out sales.

The trays can be used for large and small sandwiches, the deli trays are available in standard sizes and varying depths starting from 250 ml. They are suitable for the microwave and for attractive presentation in the refrigerated counter, have an economical sealed film lid, are leak proof during transport and easy to open.

## The ALX sealing-film

*perfect with anti-fog & easy peel*

The ALX<sup>®</sup> sealing films are perfectly adapted to our extensive tray assortment and grant an optimal product safety. Thus, the culinary delicacies have a longer shelf life and are protected during transport without leaking, spilling or dripping. The anti-mist film enables a superior product visibility in the fridge cabinet. The sealed trays are easy to peel-off before eating, although the packaging is absolutely leak-proof. On request ALX<sup>®</sup> prints the film with your corporate logo, name and slogan. The individual design of the packaging is adding brand value to your catering business. There is also plenty of space available for personalized labelling.

Multi-compartment sealing, space saving, hygienic and economical film closure, good stackability, microwaveable and ovenable temperature resistance, self-venting effect, standard print for aluminium foil, custom-design print for additional advertising, alternatively non-peel and high-barrier films available. Optionally, the ALX<sup>®</sup> trays can be closed by a show-case lid.

## The EPS hinged-lid containers

*outside cold - inside hot and appetising*

The ALX<sup>®</sup> EPS menuboxes feature a high insulating effect, so that the content stays either cold or hot. The practical foamed containers are available in different sizes, shapes and compartments – ideal for fast-food and all current quick-service applications. We offer a two colour flexo printing of your own logo. Branded boxes are creating an unique image, a better customer loyalty and conveying a professional appearance.

The standard colours white, beige and gold underline the individual dishes. The optional lamination of the inside gives higher knife resistance and the two-tab closure provides extra security. All in all, it is a cost-effective and professional packaging solution for take-away.

For finger-food, complete meals, snacks, hot and cold meals-to-go. Ideal for the growing market of take-away and home delivery. Clean and safe, comfortable grip, simple to fill, quick and easy to open, divided compartments keep food separated.
