Sealable cardboard menu boxes

The **peel & recycle** box

- Designed for food-to-go
- Ideal for hot dishes, salads or frozen food
- Can be sealed in the traysealer WITHOUT additional sealing film
- *Self-venting* for microwave use
- Viewing window for product presentation

- Five different sizes available:
250 ml to 1500 ml
-  **peel & recycle** : carton and inner film separate easily for recycling
- Main component made of **FSC® certified** cardboard for responsible forest management
- Low plastic content made of single-grade, recyclable PP

The new sealable menu boxes made of cardboard

Practical, hygienic and appealing packaging - that's what the new menu boxes from ALX® can do. However they can do more, because they consider the environmental aspect in several ways: The basic material is cardboard, which is **FSC® certified** and thus stands for sustainable forestry. The small amount of plastic used for the surface is made of recyclable PP, and best of all, these two materials can be separated from each other by **peel & recycle** and recycled separately!

peel & recycle

How it works:

The boxes are also innovative to use and offer added value: They can be sealed in ALX® traysealers in about 2 seconds without additional sealing film. They can be used in temperature ranging from -30°C up to 90°C for dry, pasty and moist food. The sealed box can even be used in the microwave, as excess pressure can escape through the provides self-venting vents.

Visually, the boxes set accents through their color scheme in natural brown. Whether sushi, steak or salad: the large viewing window ensures transparency showing the delicious contents. For contrast the box provides inside either a white or a black background - it's your choice!

Five novel boxes with added value and environmental plus		Article	Size (LxWxH, mm), ca.	Volume (ml), ca.	Pieces/carton
		C1/0250	75 x 60 x 45	250	880
		C1/0530	110 x 70 x 55	530	525
		C1/0950	154 x 123 x 45	950	300
		C1/1250	188 x 138 x 45	1250	360
		C1/1500	183 x 130 x 58	1500	320

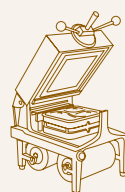

Recommended use	
Gastro application	Catering, Delivery-Service, Retail, Take-Away
Content consistency	dry to liquid, please note: Ventilation holes in the upper corners, liquid may leak out
Hotfill	possible up to 90°C, certain amount of vapor permeability
Microwave	possible when filled, up to 90°C
Temperature range	-30°C up to 90°C (max. 4 h)
Time of consumption	individual
Storage conditions	dry and ventilated environment
Sealing	in ALX® tray sealing machines and other tray sealer
Sealing film	sealable without separate sealing film
Sealing frame	ALX® sealing frame with silicone support
